

MathXL[®] for School

A powerful homework, tutorial,
and assessment program

Welcome to MathXL[®] for School!

What is MathXL for School?

With MathXL for School, teachers quickly create, edit, and assign online homework, quizzes, and tests for over 250 of Pearson's mathematics and statistics textbooks. Students practice and review with algorithmically-generated exercises to help them master math topics.

How Can I Use MathXL for School?

- **Powerful upgrade to...over 250 Pearson textbooks:** From arithmetic to calculus, MathXL for School has courses tied to the content of over 250 Pearson math and statistics textbooks at the chapter, section, and objective level.

...and any non-Pearson textbook: MathXL for School courses are flexible and rich enough to support any high school math program, regardless of publisher.
- **Rich standalone program:** Universal courses in Algebra Readiness, College Readiness, Algebra 2, and ADP Algebra 2 are designed to be used with a textbook in these subjects or as a standalone study program (*available summer 2009: Algebra 1 and ADP Algebra 1*).
- **Tool for Intervention, Credit Recovery, Remediation, Summer School, and After School:** MathXL for School can solve your assessment, credit recovery, and remediation needs for all student populations, using personalized study plans that link directly to interactive, tutorial exercises for topics that students have not yet mastered.

Try it Out!

Go to: **www.MathXLforSchool.com**. You will find several courses, including the universal courses mentioned above all set up for you, ready to explore!
